

**ADSB manages all their engineering drawings across the globe using ViciDocs ECM**

Abu Dhabi Ship Building (ADSB) was in line with the vision of H.H. Sheikh Mohammed Bin Zayed (Crown Prince of Abu Dhabi and Deputy Supreme Commander of the UAE Armed Forces) to have a world-class facility in Abu Dhabi to support the UAE Navy.

ADSB now specialises in the construction, repair and refit of Naval, Military and Commercial vessels. The company boasts an impressive portfolio of build and refit projects that are collectively worth at least AED 4 billion. Moreover, the company is widely recognised for carrying out its projects in Steel, Aluminium Alloy and High Tech Composite Materials according to the most stringent international standards.

Because of ADSB worldwide network of suppliers and customers there was the need for one central document management solution. ViciDocs ECM comes with a powerful viewer which allowed ADSB to share documents, even engineering and CAD drawings with users who don't have these expensive tools or application installed on their machines. This opened up a complete new way of interacting between parties.

The ViciDocs ECM solution entailed the following:

- Large Number of Drawings to be archived and retrieved.
- Multiple Document Formats including Paper Documents!
- High Performance requirements even at high volumes.
- Reusability of existing hardware infrastructure to keep costs low.
- Quick Retrieval of Documents based on any word in the document.

ViciDocs ECM, with its scalable architecture and Workflow component was implemented in ADSB.

**Business Needs/Issues:**

- ViciDocs ECM, with its scalable architecture and Workflow component were able to support the ADSB information processes.
- Local support, market understanding and appearance.

**Benefits for Abu Dhabi Ship Building:**

- Single, Central Repository for various types of documents in a multi-user environment.
- Full Text Search as well as metadata search.
- Elaborate Security and workflow mapping.
- Reusability of documents created in the past.
