

Welcome to the world of Document Management (ECM) and Workflow Optimisation (BPM)

Vicisoft Technologies specialises in information management solutions to structure unstructured content like images, forms, emails and documents for medium and large enterprises. In 2000, a team of highly educated professionals found each other and bundled their knowledge to bring their vision alive in the Vicisoft Enterprise Pro solution. The experience has shaped the solution to one of the top players in today's Enterprise Content Management (ECM) market with a proven track record.

The company's flagship product is ViciDocs Enterprise Pro, an integrated document management system, that has established a prestigious client list in various verticals like Financial Services, Construction, Logistics, E-governance etc.

The design, development and delivery processes are all ISO 9001-2008 certified by UKAS since 2006. This ensures you the highest standard in the market.

Why use a Document Management Solution (ECM)?

- Improve Cash Flow** - The increased productivity of processing documents immediately.
- Reduces Storage** - Decrease the cost of commercial property and the need to store documentation.
- Faster Search** - Retrieve files by any word or phrase in the document - known as full text search - a capability.
- Share Documents** - Document distribution with colleagues and clients in a controlled manner.
- No Lost Files** – See who and when a document is viewed, shared or changed.
- Improved Security** – Secure your sensitive documents better and with more flexible control.

How ViciDocs ECM works

Some of our prestigious customers

Why use a Workflow Management Solution (BPM)?

Increase Efficiency – By assigning, tracking and monitoring corporate resources and processes.

Improve Reliability - Receive accurate information as and when needed to make important business decisions.

Regulatory Compliance – Will help to keep track of obligations and ensures compliance.

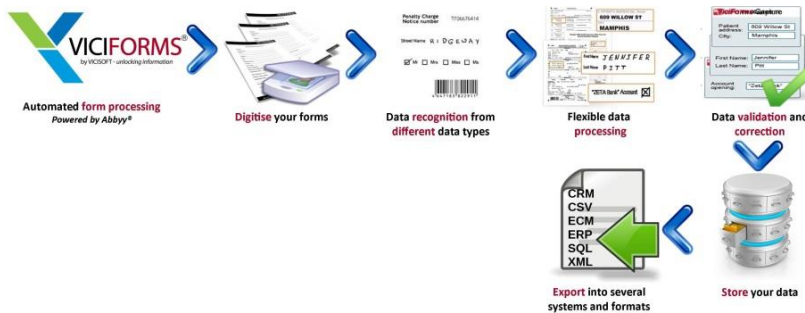

Increase Accountability - By tracking and monitoring expenditures to ensure deliverables are met.

Increase Transparency – BPM can provide information on process at all stages increasing transparency

How ViciFlow BPM works

Last but not least; our ViciForms AFP solution

ViciForms is our distributed form processing and capturing solution which includes a world leading engine that automates data extraction from paper forms.

Forms which have inputs of different types (hand printed, machine printed, barcode, OMR etc.) can be automatically recognized and verified through with Viciforms. Save time and avoid input errors with this intelligent solution which can export the validated data easily to other systems.

Fly high, get into the Cloud

ViciCloud delivers our core ECM solution as a “Cloud-based” package where you simply pay as you go. This saves you a big upfront investment in hardware, high maintenance cost and organisational pressure.

If you grow then you simply add a new user into ViciCloud. Support and advice is just a call away and you do not need to worry about new technologies or IT expertise. We will take care for that.

Why the cloud?

- ✓ Ease of Use
- ✓ Scalability
- ✓ Low Capital Expenditure (CAPEX)
- ✓ High Availability
- ✓ Low Overheads
- ✓ Quick Implementation & Rollout
- ✓ Usage based Pricing
