

Al Razi Pharmaceuticals Finds Just the Right Medicine with Cosmic EMS ERP Software.

Company Overview:

Al Razi Group in brief, is a well-established & well-connected HealthCare Group in the UAE and the Gulf, for the last 30 years with staff strength of more than 400 personnel.

The headquarters of Al Razi Group is located in Abu Dhabi with regional offices in Dubai and Al Ain.

Al Razi Group has executed numerous Turnkey Hospital Equipping Projects and Turnkey Hospital Maintenance Projects. Our Bio Medical Engineering team comprises of more than 70 Bio Medical Engineers and Technicians with distribution to more than 80 HealthCare Companies, some of the key companies we represent are Baxter, Roche, Varian, Dornier etc.

The company has executed on a Turnkey Basis the Complete Hospital Equipping Projects, which includes Supply and Installation and in some cases, Civil Construction.

Challenges Faced:

Al Razi needed to be live on an integrated ERP system in time for sales and purchase of products. They were currently on a small software package for financials and had no system for proper sales or distribution. The key was to purchase a full function system that would grow as the company grew in volume and revenue size. The system had to handle all facets of the business, including financials, distribution and Human Resources.

The Solution:

Cosmic EMS - an integrated Financial Accounting, Retail, Trading, and Distribution solution developed by Business Consultants with specific functionality and flexibility for the local market was implemented in Al Razi. Built with scalable and modular architecture, Cosmic EMS solutions are built based on the industry standard Oracle Platform and provides a wide range of features and built-in MIS reports for Enterprises.

The system is modular, enabling the user to implement and integrate in a phased manner. Its Oracle technology offers a wide variety of hardware and operating systems' choice. Each module has extensive query on any field with facilities of drill-down keys to view and analyze information pertaining to the relevant modules with simple keystrokes. The system follows a single point-of-input principle and generates all standard reports, which can be customized to meet specific organizational needs. It is broadly divided to cover the Financial and the Distribution activities of a medium to large retail/trading and Distribution organization. The system meets the local business requirements such as Post Dated Cheque management as well as extensive Landed Cost Calculation and Cost Analysis.

Benefits:

- ❖ Tighter inventory control through complete batch and expiry tracking.
- ❖ Online visibility to vendor and inventory information.
- ❖ Sales automation encompassing the full cycle of sales, from sending of quotations to dispatch of an invoice with ease and efficiency thereby increasing customer satisfaction through strengthened order management and sales module.
- ❖ Implementation of EMS financials with its flexible account formatting and intelligent transaction processing with multi company, multi currency and unique multi dimensional account structure with activities, providing users to analyze the financial data.
- ❖ An effective Human Resources module providing an up-to-date.
- ❖ Information of all employees within organization. This module is integrated with the Financials module enabling user to process and generate payroll information with extensive queries and reports.
