

Company: IFCI. Industrial & Project Financing
Body for Government of India.

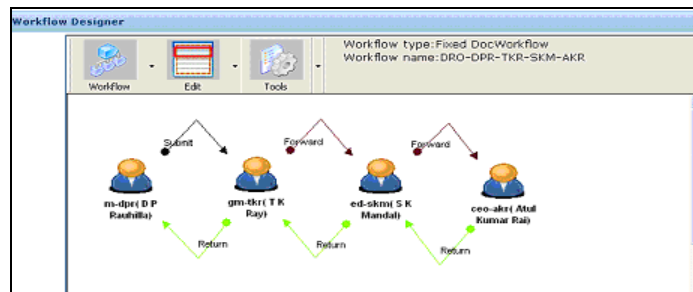

Business Challenge:

Government of India’s Premier Agency for industrial and project financing had huge physical archive of files/documents for the loans disbursed since 1948.Storage and retrieval was a major pain point.

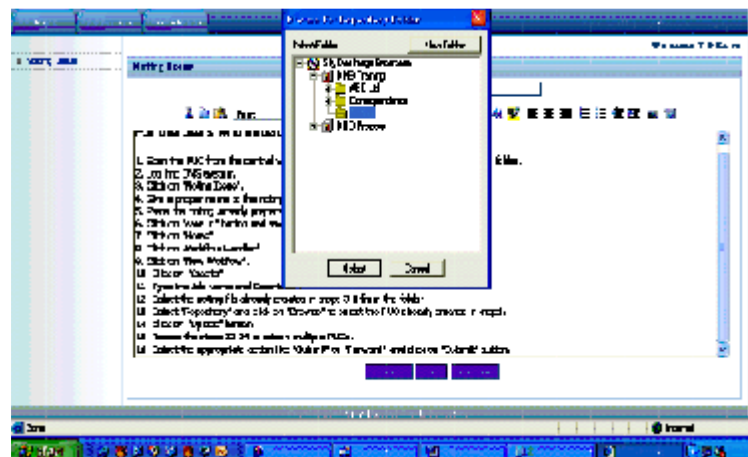

Also IFCI was looking for a file movement and tracking system for the movement of the live files.

Solution & Benefit:

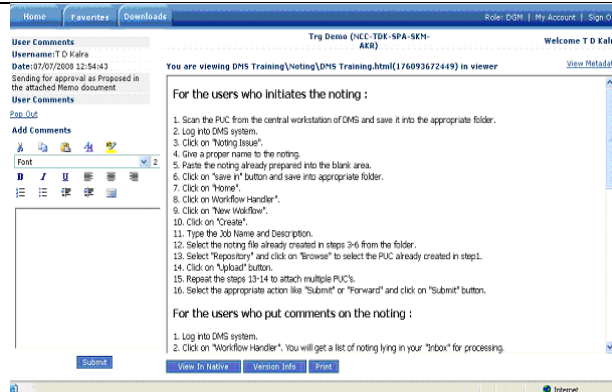

- ❖ A complete solution for loan approval using imaging technology was deployed.
- ❖ Backlog conversion of 20 lac pages using high speed scanners across two onsite locations.
- ❖ File Movement and tracking system was implemented.
- ❖ Through the workflow designer the admin user can design a workflow which may be fixed workflow or flexi workflow.

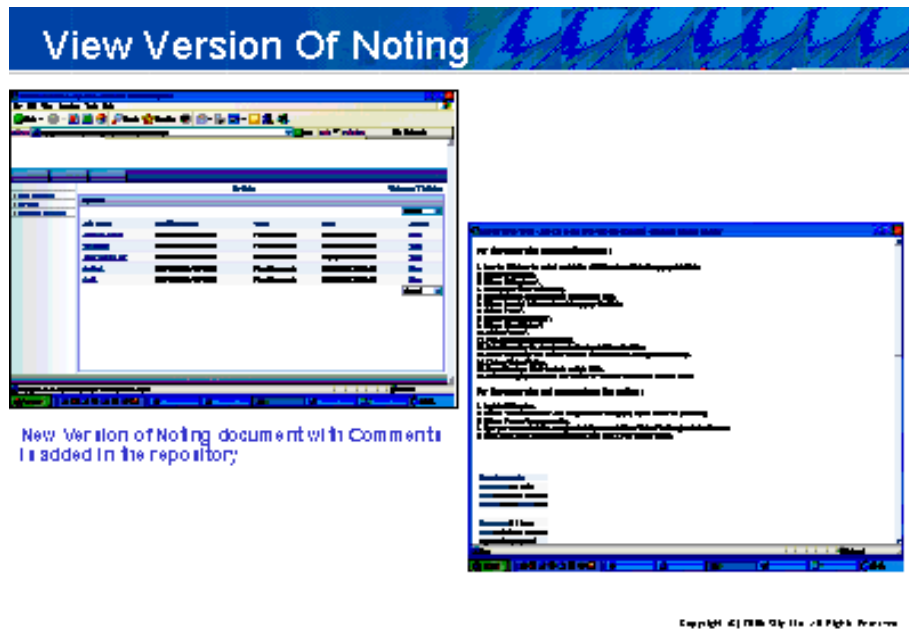

- ❖ The file movement and tracking system allowed creation of noting issue by initiating user.

- ❖ The noting issue is displayed in the viewer and the Paper under consideration can be attached whereby users can add comments, view the attached PUC and also take actions like forwarding the document.

- ❖ The file movement and tracking solution also supports new version of noting document with comments which is also added in the repository.
